

My name is Stephanie Yoshida. I live in Hawaii. We have many ocean animals, like honu. Honu is an Hawaiian sea turtle. He eats seaweed. If people throw trash into the ocean, honu can get stuck in the plastic bags and he can die. If there is too much trash, seaweed cannot grow. Honu will not have food to eat.

If I am an Ocean Protector, I would be a crab that can run very fast. I will pick up trash and run very fast to the shore to throw the trash away. I will keep the ocean clean for honu and other sea animals.
